

## Gas Control with *Flame Supervision Device*

### شیر ترموکوپل دار سماوری - بخاری مدل D

- **Approval reference:** full CE Approval (European Approval)
- **Applicable standards:** EN 126
- **Use in gas appliances for:** space heater
- **Maximum performance per hour with  $\Delta p = 3\text{mbar}$ :** 0.38 m<sup>3</sup>/h on air to flow master
- **Max. operating pressure:** 50 mbar
- **Max. operating temperature:** 80°C
- **Gas inlet:** M12 x 1 for Ø8 mm compression
- **Gas outlet:** M12 x 1 for Ø8 mm compression
- **Operating torque:** ≤ 0.4 Nm
- **Leakage rate:** ≤ 20 cc/h (P=150 mbar)
- **Life test cycle:** 40,000 cycles (20,000 at 20°C - 20,000 at 80°C)
- **Torsion:** 7 Nm for 10 sec
- **Installation position:** universal
- **Special desings and special connections:** available with a range of flow rate drilling to cover both natural and LP gases. Thermocouple connections: M8 x1, M9 x1 and M10 x1
